## CHEVRON HAS ONLY ONE STEP<sup>\*</sup>

Matthew C. Stephenson<sup>†</sup> & Adrian Vermeule<sup>‡</sup>

*Chevron, U.S.A. v. Natural Resources Defense Council*<sup>1</sup> lays out a two-step process that courts must follow when they review a federal agency's construction of a federal statute. Despite the prominence of this two-step framework, we will argue that *Chevron*, properly understood, has only one step.<sup>2</sup> *Chevron* artificially divides one inquiry into two. This creates a conceptual problem, not merely a semantic one, and thereby causes material confusion among commentators and courts, with harmful consequences for administrative law doctrine and scholarship. Rather than trying to breathe life into each of *Chevron*'s two steps, judges, scholars, and teachers of administrative law should jettison the two-step framework and acknowledge that *Chevron* calls for a single inquiry into the reasonableness of the agency's statutory interpretation.<sup>3</sup>

<sup>1</sup> 467 U.S. 837 (1984).

<sup>2</sup> We are not the first to point out the difficulties of distinguishing between *Chevron*'s two steps, and between *Chevron* and other strands of judicial review doctrine. See, e.g., Sweet Home Chapter of Communities for a Great Ore. V. Babbitt, 30 F.3d 190, 193 (D.C. Cir. 1994), *rev'd*, 515 U.S. 687 (1995); Colloquy, *Developments in Judicial Review with Emphasis on the Concepts of Standing and Deference to the Agency*, 4 ADMIN. L.J. 113, 123-24, 126 (1990) (remarks of the Hon. Stephen F. Williams) [hereinafter Williams]; Gary Lawson, *Outcome, Procedure and Process: Agency Duties of Explanation for Legal Conclusions*, 48 RUTGERS L. REV. 313, 338 (1996); Ronald M. Levin, *The Anatomy of Chevron: Step Two Reconsidered*, 72 CHI.-KENT L. REV. 1253, 1261 (1997). Indeed, leading casebooks point out the difficulties of drawing these distinctions. See GELLHORN & BYSE'S ADMINISTRATIVE LAW 1034, 1036-40 (PETER STRAUSS ET AL. EDS) (REV'D 10<sup>TH</sup> ED. 2003); ADMINISTRATIVE LAW AND REGULATORY POLICY 327-29 (STEPHEN BREYER ET AL. EDS) (6<sup>TH</sup> ED. 2006); ADMINISTRATIVE LAW: CASES AND MATERIALS 143-44 (RONALD A. CASS ET AL. EDS.) (5<sup>TH</sup> ED. 2006). These teaching materials, however, typically equivocate on whether these doctrinal distinctions are ultimately sustainable, often suggesting that they are. We want to argue unambiguously that they are not.

<sup>3</sup> A semantic difficulty with our assertion that *Chevron* has only one step involves the question whether *Chevron* applies in the first place. Commentators sometimes say that *Chevron* has no fewer than three steps: the two steps recited in *Chevron* itself, and an antecedent step at which courts decide whether *Chev-*

### Chevron's Logic, Rightly Understood

Under current doctrine, a court that reviews an agency's interpretation of a statute must address two questions (relevant here). The first question is whether the agency's construction of the statute is permissible on the merits, in light of the appropriate tools and principles of statutory interpretation. The second question is whether the agency's interpretive choice was the product of reasoned decision-making. Even if the agency's interpretation is plausible as a construction of the statutory language, the agency's choice among plausible interpretations must not be "arbitrary [or] capricious."<sup>4</sup>

*Chevron* divides the first inquiry – whether the agency's interpretation of the statute is valid – into two steps. At Step One, the court must ask whether, after "employing traditional tools of statutory construction,"<sup>5</sup> it is evident that "Congress has directly spoken to the precise question at issue;"<sup>6</sup> if so, the statute is "unambiguous[]." If, however, the court decides at Step One that the statute is ambiguous, then it proceeds to Step Two. At Step Two, the court must uphold the agency's interpretation so long as it is "based on a permissible construction of the statute." Subsequent courts and commentators have

---

*ron* or instead the older *Skidmore* analysis supplies the legal standard of deference. See *United States v. Mead Corp.*, 533 U.S. 218 (2001). This antecedent step is sometimes referred to as "*Chevron* Step Zero." See Cass R. Sunstein, *Chevron Step Zero*, 92 VA. L. REV. 187 (2006). If one accepts that terminology, then our claim is that *Chevron* has two steps rather than three: Step Zero, plus the single step created by collapsing what courts currently describe as Steps One and Two. Alternatively, some prefer to describe the antecedent issue of whether *Chevron* applies at all as the question of "*Chevron's* Domain." See Thomas W. Merrill & Kristin E. Hickman, *Chevron's Domain*, 89 GEO. L.J. 833 (2001). In that formulation, then our thesis is that once a case falls within *Chevron's* domain, the *Chevron* analysis has only one step, rather than two. For simplicity, we use the latter formulation.

<sup>7</sup> *Id.* at 843.

treated Step Two as a requirement that the agency’s statutory interpretation be “reasonable.” If it is not, the court must reject it.<sup>8</sup>

This structure artificially divides one inquiry into two steps. The single question is whether the agency’s construction is permissible as a matter of statutory interpretation; the two *Chevron* steps both ask this question, just in different ways. As a result, the two steps are mutually convertible.

If an agency’s construction of the statute is “contrary to clear congressional intent ... on the precise question at issue,”<sup>9</sup> then the agency’s construction is *a fortiori* not “based on a permissible construction of the statute.”<sup>10</sup> Step One is therefore nothing more than a special case of Step Two, which implies that all Step One opinions could be written in the language of Step Two.<sup>11</sup> Consider, as an example, *FDA v. Brown & Williamson Tobacco Corp.*,<sup>12</sup> in which the Supreme Court struck down the FDA’s assertion of statutory jurisdiction over tobacco products. The Court reached this conclusion under Step One, asserting that Congress had expressed an intention on the “precise question” of whether the FDA could regulate tobacco. It would have been equally easy, however, for the Court to find under Step One that the full scope of the FDA’s statutory jurisdiction is ambiguous – as it obviously is, given the numerous cases in which the court has found ambiguity in the same (or closely related) statutory language<sup>13</sup> – but to declare that the FDA’s assertion of

<sup>12</sup> 529 U.S. 120 (2000).

<sup>13</sup> See, e.g. *Whitaker v. Thompson*, 353 F.3d 947, 949-52 (D.C. Cir. 2004); *Ala. Tissue Center of Univ. of Ala. Health Svc Foundation v. Sullivan*, 975 F.2d 373, 378 (7<sup>th</sup> Cir. 1992); *E.R. Squibb & Sons v. Bowen*, 870 F.2d 678, 682-84 (D.C. Cir. 1989).

jurisdiction over tobacco products was unreasonable under *Chevron* Step Two, for precisely the same reasons the Court advanced in the actual opinion.

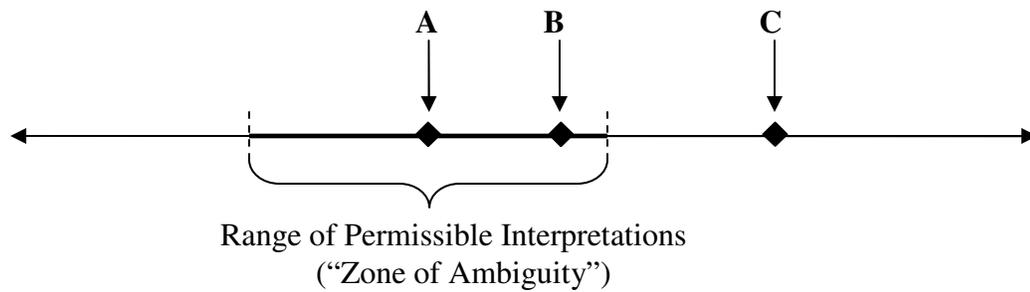

Conversely, suppose the court says that the statute is ambiguous at Step One, but that the agency's interpretation is invalid at Step Two because it is not a permissible resolution of the ambiguity. This is analytically equivalent to saying that Congress *did* have an intention on the "precise question at issue" – if that question is framed not as "What does this statute mean?" but rather "Is the agency's interpretation within the permissible range of readings?". Congress's precise intention was to exclude the agency's interpretation from the permissible range. On this account, all Step Two opinions could be rewritten in the language of Step One. In *Goldstein v. SEC*,<sup>14</sup> the D.C. Circuit struck down an SEC rule that regulated hedge funds under the Investment Advisors Act. The court apparently treated this as a *Chevron* Step Two case: The opinion acknowledged that the relevant statutory language was ambiguous, but concluded that the SEC's rule was not consistent with any permissible reading of the statute. But the court could equally have resolved the case at Step One case, framing the "precise question" as whether the Investment Advisors Act covers hedge funds, and concluding that the answer was a clear no.

Because Step One and Step Two opinions are always mutually convertible, *Chevron* has a unitary logic that requires only one step.<sup>15</sup> The following diagram illustrates the point:

---

<sup>14</sup> 451 F.3d 873 (D.C. Cir. 1996).

<sup>15</sup> See Williams, *supra* note 2, at 123-24, 126; see also Patricia M. Wald, *Judicial Review in Midpassage: The Uneasy Partnership Between Courts and Agencies Plays On*, 32 TULSA L.J. 221, 243 (1996) (suggesting that whether a case is decided at Step One or Step Two depends on "how judges define the precise question at issue, since at one level of generality the statute may answer it under *Chevron* step one, but at a more refined level there may be an ambiguity").

The diagram depicts the set of possible interpretations of a given statute as a one-dimensional space. The statutory language, read in light of the traditional tools of statutory construction, will suggest to the reviewing court both a “best” interpretation of the statute (interpretation “A” in the diagram), and a range of interpretations that are sufficiently plausible that the court would view them as reasonable, though not ideal. This range is the statute’s “zone of ambiguity,” the set of interpretations which the statute does not clearly prohibit.<sup>16</sup> If the agency promulgates an interpretation within this zone (such as interpretation “B” in the diagram), then under *Chevron* the reviewing court must uphold the agency’s interpretation, even though it differs from the court’s most-preferred construction (interpretation “A”). But if the agency chooses an interpretation outside the range of permissible meanings (such as interpretation “C” in the diagram), the court must strike it down.

In the latter case, where the court invalidates the agency’s position at C, one could say that the court decided the case at Step One, because the statute unambiguously prohibits the agency’s interpretation. One could also say that the court decided the case at

---

<sup>16</sup> The size of the zone need not be fixed by the statute itself; the amount of interpretive latitude the court gives the agency – the amount the court would permit the agency to deviate from the court’s ideal reading – may depend in part on other factors, such as court’s confidence in the agency’s expertise, its sympathy with the agency’s policy goals, or its assessment of the importance of the interpretive issue. See Matthew C. Stephenson, *The Strategic Substitution Effect: Textual Plausibility, Procedural Formality, and Judicial Review of Agency Statutory Interpretations*, 120 HARV. L. REV. 528 (2006).

Step Two. On this rendition, the court pointed out, first, that the statute is “ambiguous” in the sense that the range of permissible interpretations contains more than a single element, but, second, that the agency’s interpretation lies outside this range. It should be immediately apparent that this distinction serves no useful purpose, as the nature of the analysis is identical in either case.

We might distinguish Step One and Step Two by interpreting Step One to ask whether Congress has clearly specified *one and only one* permissible interpretation of the statute. This approach makes sense only if we assume that a statute unambiguously forbids an agency interpretation only if Congress has specified a single possible meaning. But this does not follow. Congress’ intention may be ambiguous within a range, but not at all ambiguous as to interpretations outside that range, which are clearly forbidden. As E. Donald Elliott argues,<sup>17</sup> *Chevron*’s deep logic is to eliminate the classical idea that judges always can and should find a “point estimate” of statutory meaning. Rather *Chevron* supposes that interpretation is an exercise in identifying the statute’s range of reasonable interpretations, a range that opens up a “policy space” within which agencies may make reasoned choices – the “zone of ambiguity” depicted in our diagram.

There is therefore no good reason why we should decide whether the statute has only one possible reading before deciding simply whether the agency’s interpretation falls into the range of permissible interpretations. After all, the case in which the statute has only one permissible interpretation is just a special case of the analysis described above. In our diagram, if Congress has been so clear that only one interpretation is possible, then the “zone of ambiguity” would consist of a single point (interpretation “A”), so of course

---

<sup>17</sup> See E. Donald Elliott, *Chevron Matters: How the Chevron Doctrine Redefined the Roles of Congress, Courts and Agencies in Environmental Law*, 16 VILL. ENTL. L.J. 1, 11-12 (2005).

any other interpretation (such as “B” and “C”) would fall outside the permissible zone. But nothing of consequence turns on whether the set of permissible interpretations has one element or more than one element; the only question is whether the agency’s interpretation is in that set or not.

### Chevron and Rationality Review

Some courts and commentators try to save *Chevron*’s two-step inquiry by interpreting the content of the two steps differently. On this view, the question whether the agency’s interpretation is permissible takes place entirely at Step One, while Step Two concerns the question whether the agency made its choice among permissible interpretations in a reasonable manner. Indeed, this seems to be the preferred position of most of those who have considered seriously the apparent redundancy of Steps One and Two.<sup>18</sup>

The problem with this approach is that it renders *Chevron* Step Two redundant with standard *State Farm*<sup>19</sup>-style hard look review under the “arbitrary and capricious” standard.<sup>20</sup> After all, an agency’s choice among permissible interpretations of a statutory provision is an exercise of policy discretion; *Chevron* itself is explicit about that point.<sup>21</sup>

<sup>18</sup> See *Verizon v. FCC*, 535 U.S. 467 (2002); *National Ass’n of Regulatory Utility Commissioners v. ICC*, 41 F.3d 721, 726-27 (D.C. Cir. 1994); *General Am. Transp. Corp. v. ICC*, 872 F.2d 1048, 1053 (D.C. Cir. 1989); PIERCE, *supra* note 11, at 172-74; Levin, *supra* note 2, at 1276; Gary S. Lawson, *Reconceptualizing Chevron and Discretion: A Comment on Levin and Rubin*, 72 CHI.-KENT L. REV. 1377, 1378-79 (1997); Laurence H. Silberman, *Chevron—The Intersection of Law and Policy*, 58 GEO. WASH. L. REV. 821, 827-28 (1990). For a useful summary of D.C. Circuit opinions that have treated *Chevron* Step Two and hard look review as overlapping, see Levin, *supra*, at 1263-66. Others, however, have criticized the attempt to collapse Step Two and hard look review. See *Arent v. Shalala*, 70 F.3d 610, 619-20 (D.C. Cir. 1995) (Wald, J., dissenting); *Continental Air Lines v. Dep’t of Transp.*, 843 F.2d 1444, 1452 (D.C. Cir. 1988); Wald, *supra* note 15, at 244.

<sup>19</sup> *Motor Vehicle Mfrs. Ass’n v. State Farm Mut. Auto. Ins. Co.*, 463 U.S. 29 (1983).

<sup>20</sup> See *Animal Legal Defense Fund v. Glickman*, 204 F.3d 229, 234 (D.C. Cir. 2000); PIERCE, *supra* note 11, at 172-74.

<sup>21</sup> *Chevron*, 467 U.S. at 844-845, 864-66; see also *Health Ins. Ass’n of America v. Shalala*, 23 F.3d 412, 416 (D.C. Cir. 1994) (observing that “review of an agency’s construction of an ambiguous statute is review of the agency’s policy judgments”).

As such, an agency's interpretive decision is subject to the ordinary strictures that attach to an agency's discretionary choice among policy alternatives: the decision must be based on a consideration of the relevant factors, and the agency must offer an explanation that is plausible and consistent with the evidence before the agency.<sup>22</sup> Making Step Two equivalent to the *State Farm* inquiry is therefore superfluous.

The two-step *Chevron* framework inevitably creates a redundancy; the only question is *which* redundancy it creates. If Step Two is about the plausibility of the agency's construction of the statute, then Step One and Step Two are redundant. On the other hand, if Step Two asks whether the agency's interpretation is the product of a reasoned decision-making process, then Step Two is redundant with *State Farm*. We have the doctrinal equivalent of musical chairs, with three doctrines (*Chevron* Step One, *Chevron* Step Two, *State Farm*) and only two chairs (interpretive reasonableness and reasoned decision-making). The question, therefore, is which doctrinal distinction should be collapsed, and which preserved?

Contrary to the views of most of the other scholars who have considered this issue,<sup>23</sup> we believe that conflating *Chevron* Step Two's "reasonableness" analysis with *State*

---

<sup>22</sup> *State Farm*, 463 U.S. at 42-44. Cf. *Nat'l Cable & Telecom. Ass'n v. Brand X Internet Svcs.*, 545 U.S. 967, 981 (2005) (stating that although interpretive inconsistency was irrelevant to the *Chevron* inquiry, if this inconsistency were not adequately explained it might render the agency's interpretation arbitrary and capricious under the *State Farm* inquiry); see also Lawson, *supra* note 2, at 326 (pointing out that "an agency can satisfy the *Chevron* test and still lose the case ... if the agency reaches its interpretation through a decisionmaking process that is 'arbitrary' or 'capricious'....")

<sup>23</sup> See *supra* note 18. Gary Lawson initially took the position that *Chevron*'s two steps should simply be collapsed into one inquiry, but he was subsequently persuaded by Ronald Levin's analysis that *Chevron* Step Two should be read as coterminous with *State Farm*-style hard look review. Compare Lawson, *supra* note 2, at 340 (arguing that "substantive reasonableness under *Chevron* step two should be judged solely by reference to the organic statute under consideration, while substantive reasonableness under the arbitrary or capricious test can be judged by anything that is generally relevant to reasoned decisionmaking"), with Lawson, *supra* note 18, at 1377-80 (1997) (noting that in contrast to Professor Lawson's own earlier argument, "Professor Levin would convert step one into an all-things-considered assessment of the substantive reasonableness of the agency's interpretation and make step two a straightforward application of arbitrary and capricious review," finding that this analysis is "almost certainly right," and declaring, "Sign me up"). We think Professor Lawson had it right the first time around.

*Farm*'s reasoned decision-making analysis is more confusing than our suggestion, which is simply to collapse *Chevron*'s two current steps into one. Our proposed revision would clarify the doctrine while keeping the interpretive question and the "reasoned decision-making" question analytically separate. Trying to save *Chevron*'s two steps by reading one of them as equivalent to arbitrary and capricious review serves no analytically useful purpose and even creates additional problems, as we will discuss shortly.<sup>24</sup>

### The Consequences of Confusion

Perhaps the consequences of *Chevron*'s misleading two-step structure are not severe. After all, despite the regular, almost ritualistic, invocation of the *Chevron* two-step, most courts seem to have a clear understanding of the two relevant questions – Is the agency's construction permissible? Was it the product of a reasoned decision-making process? – and they manage to address these questions without tripping over the superfluity of one or the other of *Chevron*'s two steps. A model opinion, in this respect anyway, is the Supreme Court's recent *Global Crossing* decision,<sup>25</sup> in which the Court upheld an agency regulation by simply concluding that the agency's interpretation was "reasonable [and] hence . . . lawful,"<sup>26</sup> without reciting the *Chevron* two-step test in the talismanic fashion

---

<sup>24</sup> Professor Levin – one of the principal advocates of reconceptualizing Step Two as nothing more than standard arbitrary and capricious review – has indicated that he takes this position in part because it "is too late in the day to simply abrogate the second step as excess baggage; the prestige of the *Chevron* formula makes such a development unlikely." Levin, *supra* note 2, at 1296. Although it is not entirely clear, it seems that Professor Levin may share our view that simply eliminating the distinction between Step One and Step Two would be the best and clearest solution to the doctrinal overlap. We also tend to agree with Professor Levin that if this turns out to be impossible, explicitly collapsing Step Two and *State Farm* is better than continuing to suggest some special, independent role for each of *Chevron*'s two steps. We differ from Professor Levin only insofar as we do not believe *Chevron*'s two-step structure is so sacrosanct that it must now be accommodated. In our view, it takes no more intellectual work, and no more disruption of existing doctrine, to collapse Steps One and Two than it does to collapse Step Two and *State Farm*.

<sup>25</sup> *Global Crossing Telecommunications, Inc. v. Metrophones Telecommunications, Inc.*, 127 S.Ct. 1513 (2007).

<sup>26</sup> *Id.* at 1516.

of so many lower courts. Nonetheless, we believe that the confusion engendered by *Chevron*'s artificial division of one inquiry into two steps has adverse consequences for administrative law doctrine and scholarship.

First, insofar as judges believe that Step One requires them to ascertain whether the statute has a single clear meaning before deciding whether the agency's interpretation is reasonable, the two-step structure may actually undermine some of the values that *Chevron* deference is supposed to advance. For one thing, if judges spend an inordinate amount of time trying to figure out the *best* construction of the statute, it may be difficult for them to shift mental gears to decide whether an agency interpretation that differs from the judge's sense of the best interpretation is nonetheless reasonable.<sup>27</sup> For another, the more judges are inclined to declare that a statute has one and only one meaning, the harder it will be for future agencies to adopt alternative constructions of the same statute that the initial court did not anticipate.<sup>28</sup>

Second, if judges interpret Step Two as imposing a "reasoned decision-making" requirement that strongly resembles *State Farm*, as many commentators have advocated, the result may be an unjustified departure from the standard approach to hard look review in the statutory interpretation context. Courts might mistakenly conclude that they must always resolve the question of interpretive plausibility before addressing the issue of reasoned decision-making, because the former is part of "Step One" and the latter is part of "Step Two." Yet there are cases in which the agency has clearly failed the reasoned decision-making requirement, while the interpretive question is close. It is pointless to re-

---

<sup>27</sup> It is not clear whether this is in fact a problem, and if it is, how large a problem it may be. For discussion, compare Jacob E. Gersen & Adrian Vermeule, *Chevron as a Voting Rule*, 116 YALE L.J. 676, 693-98 (2007), with Matthew C. Stephenson, *The Costs of Voting Rule Chevron: A Comment on Gersen and Vermeule's Proposal*, 116 YALE L.J. POCKET PART 238, 239-42 (2007).

<sup>28</sup> See *Nat'l Cable & Telecom. Ass'n v. Brand X Internet Svcs.*, 545 U.S. 967, 982-85 (2005).

quire courts to proceed to the reasoned decision-making question only after answering the interpretive question, and because neither question goes to the court’s jurisdiction, there is no legal obligation to do so. More generally, separating the “reasoned decision-making” requirement into two separate inquiries – *Chevron* Step Two and *State Farm* hard look review – invites courts to assume that arbitrary and capricious review is more rigorous, or less rigorous, or just somehow different in the context of statutory interpretation than in other domains where agencies make discretionary policy choices.<sup>29</sup> But there is no obvious reason why this should be so.

Third, the artificial division between *Chevron*’s two “steps” muddies the relationship between *Chevron* deference and other tools of statutory interpretation, such as canons of construction, legislative history, and purposive analysis. This is a difficult and important issue, yet judges and scholars are sometimes distracted by the question whether this or that interpretive tool ought to come into play at Step One or Step Two, instead of focusing on the real questions. Consider, for example, the Ninth Circuit’s recent en banc decision in *Morales-Izquierdo v. Gonzales*,<sup>30</sup> in which Judge Kozinski’s majority opinion and Judge Thomas’s dissent debated the appropriate relationship between *Chevron* deference and the constitutional avoidance canon.<sup>31</sup> Both opinions unhelpfully framed this difficult

---

<sup>29</sup> See *Continental Air Lines, Inc. v. Dep’t of Transportation*, 843 F.2d 1444, 1452 (D.C. Cir. 1988) (insisting that *Chevron* Step Two involves a fundamentally different sort of “reasonableness” inquiry than standard hard look review, such that the latter body of doctrine cannot be applied wholesale in the statutory interpretation context); Lawson, *supra* note 2, at 341 (stating that “the standard of review for agency outcomes under the arbitrary or capricious test may be more deferential than the standard of review under *Chevron* step two”); Williams, *supra* note 2, at 123-24, 126 (hypothesizing that *Chevron*’s two-step structure creates the misleading impression that rationality review in the statutory interpretation context is less demanding than in other contexts); Wald, *supra* note 15, at 244 (arguing that failing to recognize the distinction between *Chevron* and hard look review will lead courts to be too aggressive in reviewing agency interpretations).

<sup>30</sup> 486 F.3d 484 (9<sup>th</sup> Cir. 2007) (en banc).

<sup>31</sup> The constitutional avoidance canon instructs courts to avoid interpreting statutes in ways that raise serious constitutional questions when a reasonable alternative interpretation is available. See *NLRB v.*

problem in terms of whether the avoidance canon is relevant at Step One or not. The shared assumption seems to be that if it is (Judge Thomas's position),<sup>32</sup> then the canon takes precedence over *Chevron* deference, while if it is not (Judge Kozinski's position), the canon is irrelevant in a *Chevron* case.<sup>33</sup> Yet because *Chevron*'s two steps are mutually convertible, deciding whether the constitutional avoidance canon applies at Step One or at Step Two cannot do any meaningful analytical work. If the canon is relevant at Step One, the court must still decide whether or not the canon renders an otherwise reasonable agency interpretation clearly contrary to the statute's meaning. If the canon is relegated to the (allegedly distinct) Step Two, the court must still decide whether the canon renders an otherwise plausible agency interpretation unreasonable. The ultimate substantive question is identical in either case, so the classification question – Does the avoidance canon come into play at Step One or Step Two? – is meaningless.

Kenneth Bamberger has recently argued that normative canons of statutory interpretation, including the constitutional avoidance canon, should be treated “contextually” rather than “categorically,” and that courts deciding whether to use such canons to override agency interpretations should therefore invoke these canons at Step Two rather than at Step One.<sup>34</sup> A great deal may turn on whether the relationship between *Chevron* and various canons of construction is governed by a rule-like hierarchy of interpretive principles or by a more standard-like contextual inquiry. But nothing at all turns on whether normative canons are brought into the interpretive inquiry at Step One or Step Two, be-

---

Catholic Bishop of Chicago, 440 U.S. 490 (1979); *Edward J. DeBartolo Corp. v. Fla. Gulf Coast Building & Construction Trades Council*, 485 U.S. 568 (1988),

<sup>32</sup> See *Morales-Izquierdo*, 486 F.3d, at 505 (Thomas, J., dissenting).

<sup>33</sup> See *Morales-Izquierdo*, 486 F.3d, at 492-93.

<sup>34</sup> Kenneth A. Bamberger, *Normative Canons in the Review of Administrative Policymaking*, 118 YALE L.J. (forthcoming 2008).

cause the two steps are mutually convertible. If, in context, judges find that normative canons are sufficiently powerful to indicate an actual or constructive congressional intention that makes the agency's reading impermissible, then this conclusion can be written in either the terms of Step One (an intention on the precise issue) or in terms of Step Two (an impermissible reading of statutory ambiguity).<sup>35</sup> A unitary *Chevron* inquiry can accommodate any degree of context-specificity that is thought desirable, and conflating the question whether the relationship between *Chevron* and normative canons should be governed by rules or standards with an (artificial) choice between applying those canons at Step One or Step Two obscures the more important substantive and methodological questions at stake.

### Conclusion

Sometimes judges write watershed opinions whose deep logic only gradually becomes clear, and whose language fails to capture that deep logic. In such cases, there is no need for courts and scholars to cling to the original language of the opinion, at least where abandoning the original language would clarify matters without loss of content. *Chevron* is a case of this sort. Judges and scholars could simplify matters, at no collateral cost, by recognizing that *Chevron*, notwithstanding the language of the opinion itself and decades of subsequent exegesis, has only one step.
